**CITY OF CRESTVIEW  
POLICE OFFICERS' & FIREFIGHTERS' RETIREMENT PLAN  
PENSION BOARD OF TRUSTEES  
QUARTERLY MEETING MINUTES  
198 N. Wilson Street, Crestview, FL 32536**

Tuesday, March 5, 2024, at 2:30pm

**TRUSTEES PRESENT:** Andrew Schneider  
David Griggs  
Dan Krusenklau

**TRUSTEES ABSENT:** Ellis Conner  
Corey Winkler

**OTHERS PRESENT:** Tyler Grumbles, AndCo Consulting  
Sean Sendra, Klausner, Kaufman, Jensen, & Levinson  
Siera Feketa, Foster & Foster  
Billy Gilliam, City Comptroller  
Mark Rhein, Salem Trust  
Justin Hildebrand/Ryon Acey, Agincourt Capital

1. **Call to Order** – The meeting was called to order at 2:30pm.
2. **Roll Call** – As reflected above.
3. **Public Comments** – None.
4. **Approval of Minutes**
  - a. November 28, 2023, quarterly meeting
    - i. Dan Krusenklau commented they voted down the portal at the last meeting, but at the 2/28/23 meeting they approved the portal. Siera Feketa provided clarification commenting they approved the pensioner portal, but they did not approve the Foster & Foster member portal.

**The minutes from the November 28, 2023, quarterly meeting were approved, upon motion by Dan Krusenklau and second by David Griggs; motion carried 3-0.**

5. **Reports (Attorney/Consultants)**
  - a. Salem Trust, Mark Rhein, Plan Custodian
    - i. Update from custodian
      1. Mark Rhein gave an update on the pensioner portal.
      2. Mark Rhein gave a brief update on the merger with Argent and Salem Trust.
      3. Dan Krusenklau and Mark Rhein discussed the outlook on the growth of Salem Trust.
  - b. Agincourt Capital, Justin Hildebrand/Ryon Aced, Investment Manager
    - i. Investment Performance Report
      1. Ryon Aced introduced himself and gave a brief overview of Agincourt.
      2. Ryon Acey reviewed the professionals within Agincourt.
      3. Ryon Acey discussed the current treasury market.

4. Justin Hildebrand introduced himself. Justin discussed their investment process.
  5. Justin Hildebrand reviewed the macro factor analysis.
  6. Justin Hildebrand reviewed the corporate allocation.
  7. Justin Hildebrand, Ryon Acey, and Dan Krusenklaus discussed how often they reassess their allocations.
- c. AndCo Consulting, Tyler Grumbles, Investment Consultant
- i. Quarterly report as of December 31, 2023
    1. Tyler Grumbles briefly reviewed the firm update.
    2. Tyler Grumbles gave an update on the market for the quarter.
    3. Tyler Grumbles reviewed the asset allocation by asset class.
    4. Tyler Grumbles reviewed the asset allocation compliance. Dan Krusenklaus commented there was 2.4% missing on the asset allocation compliance. Tyler Grumbles commented that 2.4% was cash.
    5. Tyler Grumbles reviewed the financial reconciliation.
    6. As of December 31, 2023, the market value of assets was \$28,648,271. The total fund net returns for the quarter were 7.73%, slightly outperforming the policy benchmark of 7.67%. The trailing returns for the 1, 3, 4, and 5-year periods were 12.56%, 3.90%, 5.91%, and 8.60% respectively. Since inception (10/01/1994) returns were 7.26%, slightly underperforming the policy benchmark of 7.73%.
    7. Tyler Grumbles discussed the performance of the managers and how they impacted the overall portfolio.
- d. Klausner, Kaufman, Jensen, & Levinson, Sean Sendra, Board Attorney
- i. AndCo acquisition by Mariner
    1. Tyler Grumbles discussed the acquisition of AndCo my Mariner. Tyler gave an overview of Mariner. Tyler commented the Board/Plan won't have any changes. The only real change was going to be to the name. Tyler requested consent of the acquisition.
    2. Dan Krusenklaus and Tyler Grumbles discussed Mariner.
    3. Sean Sendra commented they reviewed the consent agreement and had no issues, but when the acquisition closes in April he would be drafting a new contract to sign.

**The Board voted to approve the consent to acquisition, upon motion by David Griggs and second by Dan Krusenklaus, motion carried 3-0.**

- ii. Salem Trust Assignment and Assumption Agreement
  1. Sean Sendra briefly reviewed commenting they had no issues with this agreement either.

**The Board voted to approve the Salem Trust Assignment and Assumption Agreement, upon motion by Dan Krusenklaus and second by David Griggs, motion carried 3-0.**

- iii. Electronic Financial Disclosure Management System for Form 1 filing
  1. Sean Sendra briefly reviewed the new filing requirement commenting they must file online now. Billy Gilliam commented Maryanne was the coordinator for the City.
- iv. Update on 25 & Out ordinance

1. The ordinance passed the second reading and had been taken care of.
- v. 2024 IRS mileage rate
  1. Sean Sendra commented the IRS mileage rate was now 67 cents.
- vi. Legislative update
  1. Sean Sendra commented there were no issues that would impact the pension.

6. **Old Business** - None

7. **New Business** - None

8. **Consent Agenda**

- a. Payment ratification – Warrants #33, #34
- b. Invoices for approval – None
- c. Fund activity report for November 22, 2023 – February 27, 2024

**The Board voted to approve the Consent Agenda as presented, upon motion by David Griggs and second by Dan Krusenklau; motion carried 3-0.**

10. **Staff Reports, Discussion and Action**

- a. Foster & Foster, Siera Feketa, Plan Administrator
  - i. Foster & Foster staff update
    1. Siera Feketa gave a brief update commented Michelle Rodriguez was no longer with Foster & Foster. Siera commented they shouldn't experience any issues with service and Siera Feketa would serve as the main contact for now.
  - ii. Educational Opportunity
    1. Siera Feketa reviewed the upcoming FPPTA Virtual Class regarding the new financial disclosure form filing on March 14th and April 18th.

11. **Trustee Reports, Discussion and Action** – None.

12. **Adjournment** - The meeting adjourned at 4:43pm.

13. **Next Meeting** – June 4, 2024, at 2:30pm.

Board of Trustees  
City of Crestview  
Firefighters and Police Officers' Pension Board

Re: City of Crestview Police Officers' and Firefighters' Retirement Plan

Dear Board:

We are pleased to present to the Board this report of the annual actuarial valuation of the City of Crestview Police Officers' and Firefighters' Retirement Plan. The valuation was performed to determine whether the assets and contributions are sufficient to provide the prescribed benefits and to develop the appropriate funding requirements for the applicable plan year. Use of the results for other purposes may not be applicable and may produce significantly different results.

The valuation has been conducted in accordance with generally accepted actuarial principles and practices, including the applicable Actuarial Standards of Practice as issued by the Actuarial Standards Board, and reflects laws and regulations issued to date pursuant to the provisions of Chapters 112, 175, and 185, Florida Statutes, as well as applicable federal laws and regulations. In our opinion, the assumptions used in the valuation, as adopted by the Board of Trustees, represent reasonable expectations of anticipated plan experience.

The funding percentages and unfunded accrued liability as measured based on the actuarial value of assets will differ from similar measures based on the market value of assets. These measures, as provided, are appropriate for determining the adequacy of future contributions, but may not be appropriate for the purpose of settling a portion or all of its liabilities. Future actuarial measurements may differ significantly from the current measurements presented in this report for a variety of reasons including: changes in applicable laws, changes in plan provisions, changes in assumptions, or plan experience differing from expectations. Due to the limited scope of the valuation, we did not perform an analysis of the potential range of such future measurements.

In conducting the valuation, we have relied on personnel, plan design, and asset information supplied by the City of Crestview, financial reports prepared by the custodian bank, and the actuarial assumptions and methods described in the Actuarial Assumptions section of this report. While we cannot verify the accuracy of all this information, the supplied information was reviewed for consistency and reasonableness. As a result of this review, we have no reason to doubt the substantial accuracy of the information and believe that it has produced appropriate results. This information, along with any adjustments or modifications, is summarized in various sections of this report.

Additionally, we used third-party software to model (calculate) the underlying liabilities and costs. These results are reviewed in the aggregate and for individual sample lives. The output from the software is either used directly or input into internally developed models that apply the funding rules to generate the results. All internally developed models are reviewed as part of the valuation process. As a result of this review, we believe that the models have produced reasonable results. We do not believe there are any material inconsistencies among assumptions or unreasonable output produced due to the aggregation of assumptions.

In our opinion, the Minimum Required Contribution set forth in this report constitutes a reasonable actuarially determined contribution under Actuarial Standard of Practice No. 4.

The undersigned are familiar with the immediate and long-term aspects of pension valuations and meet the Qualification Standards of the American Academy of Actuaries necessary to render the actuarial opinions contained herein. All of the sections of this report are considered an integral part of the actuarial opinions.

To our knowledge, no associate of Foster & Foster, Inc. working on valuations of the program has any direct financial interest or indirect material interest in the City of Crestview, nor does anyone at Foster & Foster, Inc. act as a member of the Board of Trustees of the Police Officers' and Firefighters' Retirement Plan. Thus, there is no relationship existing that might affect our capacity to prepare and certify this actuarial report.

If there are any questions, concerns, or comments about any of the items contained in this report, please contact us at 239-433-5500.

Respectfully submitted,

Foster & Foster, Inc.

## SUMMARY OF REPORT

The regular annual actuarial valuation of the City of Crestview Police Officers' and Firefighters' Retirement Plan, performed as of October 1, 2023, has been completed and the results are presented in this Report. The contribution amounts set forth herein are applicable to the plan/fiscal year ending September 30, 2025.

The contribution requirements, compared with those set forth in the August 25, 2023 actuarial impact statement, are as follows:

| Valuation Date<br>Applicable to Fiscal Year Ending                                     | 10/1/2023<br><u>9/30/2025</u> | 10/1/2022<br><u>9/30/2024</u> |
|----------------------------------------------------------------------------------------|-------------------------------|-------------------------------|
| Minimum Required Contribution<br>% of Projected Annual Payroll                         | 31.3%                         | 29.5%                         |
| Member Contributions (Est.)<br>% of Projected Annual Payroll                           | 6.4%                          | 6.4%                          |
| <b>City And State Required Contribution<br/>    % of Projected Annual Payroll</b>      | <b>24.9%</b>                  | <b>23.1%</b>                  |
| State Contribution (Est.) <sup>1</sup><br>% of Projected Annual Payroll (Est.)         | \$515,326<br>8.9%             | \$515,326<br>8.9%             |
| City Required Contribution (Est.) <sup>2</sup><br>% of Projected Annual Payroll (Est.) | 16.0%                         | 14.2%                         |

<sup>1</sup> Represents the amount received in calendar 2023. As per Ordinance 1951, all State Monies received each year will be available to offset the City's required contribution.

<sup>2</sup> The required contribution from the combination of City and State sources for the year ending September 30, 2025, is 24.9% of the actual payroll realized in that year. As a budgeting tool, the City may contribute 16.0% of each Member's Salary and then make a one-time adjustment to account for the actual State Monies received.

As you can see, the Minimum Required Contribution shows an increase when compared to the results set forth in the August 25, 2023 actuarial impact statement. The increase is mainly attributable to net unfavorable plan experience as outlined in the following paragraph.

Plan experience was unfavorable overall on the basis of the plan's actuarial assumptions. Sources of actuarial loss included an average salary increase of 17.81% which exceeded the 5.99% assumption and an investment return of 4.81% (Actuarial Asset Basis) which fell short of the 7.00% assumption. These losses were offset in part by a gain associated with favorable turnover experience.

## CHANGES SINCE PRIOR VALUATION

### Plan Changes

A Member's normal retirement date shall be the first day of the month coincident with, or next following the earlier of the attainment of age fifty-five (55) and the completion of ten (10) years of Credited Service or the ~~attainment of age fifty-two (52) and the completion of twenty-five (25) years of Credited Service~~ regardless of age. A Member may retire on his normal retirement date or on the first day of any month thereafter, and each Member shall become 100% vested in his accrued benefit on the Member's normal retirement date. Normal retirement under the System is Retirement from employment with the City on or after the normal retirement date. We assumed 100% retirement once a member reaches 25 years of credited service.

Additionally, effective with the premium tax monies received for calendar year 2022, all premium tax monies shall be used to offset the City's contribution.

### Actuarial Assumption/Method Changes

There have been no assumption or method changes since the prior valuation.

## CONTRIBUTION IMPACT OF ANNUAL CHANGES

|                                                                         |             |
|-------------------------------------------------------------------------|-------------|
| (1) Contribution Determined as of October 1, 2022                       | 12.8%       |

| City and State Requirement  | 1,042,470        |
| Actual Contributions Made:  |                  |
| Members (excluding buyback) | 366,583          |
| City                        | 872,837          |
| State                       | <u>515,326</u>   |
| Total                       | 1,754,746        |

G. Net Actuarial (Gain)/Loss 2,031,157

<sup>1</sup> The asset values and liabilities include accumulated DROP and Share Plan Balances as of 9/30/2023 and 9/30/2022.

<sup>2</sup> Contributions developed as of 10/1/2023 are expressed as a percentage of Projected Annual Payroll at 10/1/2023 of \$5,802,370.

H. Schedule Illustrating the Amortization of the Total Unfunded Actuarial Accrued Liability as of:

| <u>Year</u> | <u>Projected Unfunded<br/>Actuarial Accrued Liability</u> |
|-------------|-----------------------------------------------------------|
| 2023        | 6,357,446                                                 |
| 2024        | 6,151,015                                                 |
| 2025        | 5,918,279                                                 |
| 2029        | 4,664,785                                                 |
| 2033        | 2,790,334                                                 |
| 2036        | 852,789                                                   |
| 2040        | 0                                                         |

I. (i) 5 Year Comparison of Actual and Assumed Salary Increases

|                      | <u>Actual</u> | <u>Assumed</u> |
|----------------------|---------------|----------------|
| Year Ended 9/30/2023 | 17.81%        | 5.99%          |
| Year Ended 9/30/2022 | 7.43%         | 5.91%          |
| Year Ended 9/30/2021 | 8.56%         | 6.19%          |
| Year Ended 9/30/2020 | 5.98%         | 6.13%          |
| Year Ended 9/30/2019 | 8.79%         | 6.14%          |

(ii) 5 Year Comparison of Investment Return on Market Value and Actuarial Value

|                      | <u>Market Value</u> | <u>Actuarial Value</u> | <u>Assumed</u> |
|----------------------|---------------------|------------------------|----------------|
| Year Ended 9/30/2023 | 9.83%               | 4.81%                  | 7.00%          |
| Year Ended 9/30/2022 | -13.30%             | 5.52%                  | 7.00%          |
| Year Ended 9/30/2021 | 19.40%              | 9.85%                  | 7.25%          |
| Year Ended 9/30/2020 | 8.12%               | 7.42%                  | 7.25%          |
| Year Ended 9/30/2019 | 3.94%               | 7.73%                  | 7.25%          |

(iii) Average Annual Payroll Growth

|                         |           |             |
|-------------------------|-----------|-------------|
| (a) Payroll as of:      | 10/1/2023 | \$5,802,370 |
|                         | 10/1/2013 | 4,171,345   |
| (b) Total Increase      |           | 39.10%      |
| (c) Number of Years     |           | 10.00       |
| (d) Average Annual Rate |           | 3.36%       |

## STATEMENT BY ENROLLED ACTUARY

This actuarial valuation was prepared and completed by me or under my direct supervision, and I acknowledge responsibility for the results. To the best of my knowledge, the results are complete and accurate, and in my opinion, the techniques and assumptions used are reasonable and meet the requirements and intent of Part VII, Chapter 112, Florida Statutes. There is no benefit or expense to be provided by the plan and/or paid from the plan's assets for which liabilities or current costs have not been established or otherwise taken into account in the valuation. All known events or trends which may require a material increase in plan costs or required contribution rates have been taken into account in the valuation.

A handwritten signature in blue ink, appearing to read 'JL Griffin', is written over a horizontal line.

Joseph L. Griffin, ASA, EA, MAAA  
Enrolled Actuary #23-6938

Please let us know when the report is approved by the Board and unless otherwise directed we will provide copies of the report to the following offices to comply with Chapter 112 Florida Statutes:

Mr. Keith Brinkman  
Bureau of Local  
Retirement Systems  
Post Office Box 9000  
Tallahassee, FL 32315-9000

Mr. Steve Bardin  
Municipal Police and Fire  
Pension Trust Funds  
Division of Retirement  
Post Office Box 3010  
Tallahassee, FL 32315-3010

## RECONCILIATION OF UNFUNDED ACTUARIAL ACCRUED LIABILITIES

|      |                                                                                                   |             |

## DETAILED ACTUARIAL (GAIN)/LOSS ANALYSIS

|                                                                       |               |
|-----------------------------------------------------------------------|---------------|
| (1) Unfunded Actuarial Accrued Liability (UAAL) as of October 1, 2022 | \$4,718,909   |
| (2) Expected UAAL as of October 1, 2023                               | 4,326,289     |
| (3) Summary of Actuarial (Gain)/Loss, by component:                   |               |
| Investment Return (Actuarial Asset Basis)                             | 585,177       |
| Salary Increases                                                      | 1,488,026     |
| Active Decrements                                                     | (191,675)     |
| Inactive Mortality                                                    | 62,265        |
| Interest Crediting on Share Plan Balances                             | 34,279        |
| Other                                                                 | <u>53,085</u> |
| Increase in UAAL due to (Gain)/Loss                                   | 2,031,157     |
| Assumption Changes                                                    | <u>0</u>      |
| (4) Actual UAAL as of October 1, 2023                                 | \$6,357,446   |

HISTORY OF FUNDING PROGRESS

## ACTUARIAL ASSUMPTIONS AND METHODS

### Mortality Rate

#### *Healthy Active Lives:*

**Female:** PubS.H-2010 (Below Median) for Employees, set forward one year.

**Male:** PubS.H-2010 (Below Median) for Employees, set forward one year.

#### *Healthy Retiree Lives:*

**Female:** PubS.H-2010 for Healthy Retirees, set forward one year.

**Male:** PubS.H-2010 for Healthy Retirees, set forward one year.

#### *Beneficiary Lives:*

**Female:** PubG.H-2010 for Healthy Retirees.

**Male:** PubG.H-2010 for Healthy Retirees, set back one year.

#### *Disabled Lives:*

80% PubG.H-2010 for Disabled Retirees / 20% PubS.H-2010 for Disabled Retirees.

All rates for healthy lives are projected generationally with Mortality Improvement Scale MP-2018. We feel this assumption sufficiently accommodates future mortality improvements.

The previously described mortality assumption rates were mandated by Chapter 2015-157, Laws of Florida. This law mandates the use of the assumptions used in either of the two most recent valuations of the Florida Retirement System (FRS). The above rates are those outlined in Milliman's July 1, 2021 FRS valuation report for special risk employees, with appropriate adjustments made based on plan demographics.

### Interest Rate

7.00% per year compounded annually, net of investment related expenses. This is supported by the target asset allocation of the trust and the expected long-term return by asset class.

### Salary Increases

| Salary Scale |        |
|--------------|--------|
| Age          | Rate   |
| <25          | 10.00% |
| 25-39        | 6.50%  |
| 40-44        | 5.00%  |
| 45+          | 4.50%  |

The assumed rates were approved in conjunction with an actuarial experience study dated November 24, 2021.

### Payroll Growth

1.82% for purposes of amortizing the Unfunded Actuarial Accrued Liability. This assumption cannot exceed the ten-year average payroll growth, in compliance with Part VII of Chapter 112, Florida Statutes.

### Administrative Expenses

\$85,283 annually, based on the average of actual expenses incurred in the prior two fiscal years.

### Amortization Method

New UAAL amortization bases are amortized over 15 years.

The amortization payment is subject to a minimum based on a 30-year amortization of the UAAL, if the UAAL is positive, in order to comply with Actuarial Standard of Practice No. 4.

Bases established prior to the valuation date are adjusted proportionally to match the Expected Unfunded Actuarial Accrued Liability as of the valuation date, in order to align prior year bases with the portion of the current year UAAL associated with prior year sources.

### Retirement Age

| % Retiring During the<br>Year (10-24 Years of Service) |        |
|--------------------------------------------------------|--------|
| Age                                                    | Rate   |
| 45-51                                                  | 7.5%   |
| 52-54                                                  | 10.0%  |
| 55                                                     | 25.0%  |
| 56                                                     | 33.3%  |
| 57                                                     | 50.0%  |
| 58+                                                    | 100.0% |

100% are assumed to retire upon attainment of 25 years of service. The assumed rates were approved in conjunction with an actuarial experience study dated November 24, 2021, and amended as a result of Ordinance 1958.

### Funding Method

Entry Age Normal Actuarial Cost Method. The following loads are applied for determining the minimum required contribution:

Interest - A half year, based on current 7.00% assumption.

Salary - None.

### Actuarial Asset Method

All assets are valued at market value with an adjustment to uniformly spread actuarial investment gains and losses (as measured by actual market value investment return against expected market value investment return) over a five-year period.

### Disability Rate

| % Becoming Disabled<br>During the Year |       |
|----------------------------------------|-------|
| Age                                    | Rate  |
| 20                                     | 0.07% |
| 25                                     | 0.08% |
| 30                                     | 0.09% |
| 35                                     | 0.12% |
| 40                                     | 0.15% |
| 45                                     | 0.26% |
| 50                                     | 0.50% |
| 55                                     | 0.78% |
| 60+                                    | 1.05% |

Sample rates above. It is also assumed that 90% of Firefighter disablements and 75% of Police Officer disablements are service related. The assumed rates were approved in conjunction with an actuarial experience study dated November 24, 2021.

### Termination Rate

| % Terminating<br>During the Year |       |
|----------------------------------|-------|
| Service                          | Rate  |
| <3                               | 20.0% |
| 3                                | 12.0% |
| 4                                | 11.0% |
| 5                                | 10.0% |
| 6                                | 9.0%  |
| 7                                | 8.0%  |
| 8                                | 7.0%  |
| 9                                | 6.0%  |
| 10                               | 5.0%  |
| 11                               | 4.0%  |
| 12                               | 3.0%  |
| 13                               | 2.5%  |
| 14                               | 2.0%  |
| 15                               | 1.5%  |
| 16+                              | 1.0%  |

The assumed rates were approved in conjunction with an actuarial experience study dated November 24, 2021.

### Low-Default-Risk Obligation Measure

Based on the Entry Age Normal Actuarial Cost Method and an interest rate of 4.87% per year compounded annually, net of investment related expenses. This rate is consistent with the Yield to Maturity of the S&P Municipal Bond 20-Year High Grade Rate Index as of September 30, 2023. All other assumptions for the Low-Default-Risk Obligation Measure are consistent with the assumptions shown in this section unless otherwise noted.

## GLOSSARY

Actuarial Value of Assets is the asset value used in the valuation to determine contribution requirements. It represents the plan's Market Value of Assets (see below), with adjustments according to the plan's Actuarial Asset Method. These adjustments produce a "smoothed" value that is likely to be less volatile from year to year than the Market Value of Assets.

Entry Age Normal Cost Method - Under this method, the normal cost is the sum of the individual normal costs for all active participants. For an active participant, the normal cost is the participant's normal cost accrual rate, multiplied by the participant's current compensation.

(a) The normal cost accrual rate equals:

(i) the present value of future benefits for the participant, determined as of the participant's entry age, divided by

(ii) the present value of the compensation expected to be paid to the participant for each year of the participant's anticipated future service, determined as of the participant's entry age.

(b) In calculating the present value of future compensation, the salary scale is applied both retrospectively and prospectively to estimate compensation in years prior to and subsequent to the valuation year based on the compensation used for the valuation.

(c) The accrued liability is the sum of the individual accrued liabilities for all participants and beneficiaries. A participant's accrued liability equals the present value, at the participant's attained age, of future benefits less the present value at the participant's attained age of the individual normal costs payable in the future. A beneficiary's accrued liability equals the present value, at the beneficiary's attained age, of future benefits. The unfunded accrued liability equals the total accrued liability less the actuarial value of assets.

(d) Under this method, the entry age used for each active participant is the participant's age at the time he or she would have commenced participation if the plan had always been in existence under current terms, or the age as of which he or she first earns service credits for purposes of benefit accrual under the current terms of the plan.

Market Value of Assets is the fair market value of plan assets as of the valuation date. This amount may be adjusted to produce an Actuarial Value of Assets for plan funding purposes.

Normal (Current Year's) Cost is the current year's cost for benefits yet to be funded. Under the Entry Age Normal cost method, it is determined for each participant as the present value of future benefits, determined as of the Member's entry age, amortized as a level percentage of compensation over the anticipated number of years of participation, determined as of the entry age.

Payroll Under Assumed Ret. Age is the projected annual rate of pay for the fiscal year beginning on the valuation date of all covered Members, excluding any Members who are assumed to retire with 100% probability on the valuation date.

Projected Annual Payroll is the projected annual rate of pay for the fiscal year following the fiscal year beginning on the valuation date of all covered Members.

Present Value of Benefits is the single sum value on the valuation date of all future benefits to be paid to current plan participants.

Total Annual Payroll is the projected annual rate of pay for the fiscal year beginning on the valuation date of all covered Members.

Total Required Contribution is equal to the Normal Cost plus an amount sufficient to amortize the Unfunded Accrued Liability over no more than 30 years. The required amount is adjusted for interest according to the timing of contributions during the year.

Unfunded Actuarial Accrued Liability (UAAL) is the difference between the actuarial accrued liability (described above) and the Actuarial Value of Assets. Under the Entry Age Normal Actuarial Cost Method, an actuarial gain or loss, based on actual versus expected UAAL, is determined in conjunction with each valuation of the plan.

## DISCUSSION OF RISK

ASOP No. 51, Assessment and Disclosure of Risk Associated with Measuring Pension Obligations and Determining Pension Plan Contributions, states that the actuary should identify risks that, in the actuary's professional judgment, may reasonably be anticipated to significantly affect the plan's future financial condition.

Throughout this report, actuarial results are determined using various actuarial assumptions. These results are based on the premise that all future plan experience will align with the plan's actuarial assumptions; however, there is no guarantee that actual plan experience will align with the plan's assumptions. It is possible that actual plan experience will differ from anticipated experience in an unfavorable manner that will negatively impact the plan's funded position.

Below are examples of ways in which plan experience can deviate from assumptions and the potential impact of that deviation. Typically, this results in an actuarial gain or loss representing the current-year financial impact on the plan's unfunded liability of the experience differing from assumptions; this gain or loss is amortized over a period of time determined by the plan's amortization method. When assumptions are selected that adequately reflect plan experience, gains and losses typically offset one another in the long term, resulting in a relatively low impact on the plan's contribution requirements associated with plan experience. When assumptions are too optimistic, losses can accumulate over time and the plan's amortization payment could potentially grow to an unmanageable level.

- Investment Return: When the rate of return on the Actuarial Value of Assets falls short of the assumption, this produces a loss representing assumed investment earnings that were not realized. Further, it is unlikely that the plan will experience a scenario that matches the assumed return in each year as capital markets can be volatile from year to year. Therefore, contribution amounts can vary in the future.
- Salary Increases: When a plan participant experiences a salary increase that was greater than assumed, this produces a loss representing the cost of an increase in anticipated plan benefits for the participant as compared to the previous year. The total gain or loss associated with salary increases for the plan is the sum of salary gains and losses for all active participants.
- Payroll Growth: The plan's payroll growth assumption, if one is used, causes a predictable annual increase in the plan's amortization payment in order to produce an amortization payment that remains constant as a percentage of payroll if all assumptions are realized. If payroll increases less than the plan's payroll growth assumption, the plan's amortization payment can increase significantly as a percentage of payroll even if all assumptions other than the payroll growth assumption are realized.
- Demographic Assumptions: Actuarial results take into account various potential events that could happen to a plan participant, such as retirement, termination, disability, and death. Each of these potential events is assigned a liability based on the likelihood of the event and the financial consequence of the event for the plan. Accordingly, actuarial liabilities reflect a blend of financial consequences associated with various possible outcomes (such as retirement at one of various possible ages). Once the outcome is known (e.g. the participant retires) the liability is adjusted to reflect the known outcome. This adjustment produces a gain or loss depending on whether the outcome was more or less favorable than other outcomes that could have occurred.

### Impact of Plan Maturity on Risk

For newer pension plans, most of the participants and associated liabilities are related to active members who have not yet reached retirement age. As pension plans continue in operation and active members reach retirement ages, liabilities begin to shift from being primarily related to active members to being shared amongst active and retired members. Plan maturity is a measure of the extent to which this shift has occurred. It is important to understand that plan maturity can have an impact on risk tolerance and the overall risk characteristics of the plan. For example, closed plans with a large amount of retired liability do not have as long of a time horizon to recover from losses (such as losses on investments due to lower than expected investment returns) as plans where the majority of the liability is attributable to active members. For this reason, less tolerance for investment risk may be warranted for highly mature closed plans with a substantial inactive liability. Similarly, mature closed plans paying substantial retirement benefits resulting in a small positive or net negative cash flow can be more sensitive to near term investment volatility, particularly if the size of the fund is shrinking, which can result in less assets being available for investment in the market.

To assist with determining the maturity of the plan, we have provided some relevant metrics in the table following titled “Plan Maturity Measures and Other Risk Metrics”. Highlights of this information are discussed below:

- The Support Ratio, determined as the ratio of active to inactive members, has decreased from 613.3% on October 1, 2013 to 241.7% on October 1, 2023, indicating that the plan has been maturing during the period.
- The Accrued Liability Ratio, determined as the ratio of the Inactive Accrued Liability, which is the liability associated with members who are no longer employed but are due a benefit from the plan, to the Total Accrued Liability, is 38.9%. With a plan of this maturity, losses due to lower than expected investment returns or demographic factors may result in lower volatility in contribution requirements when compared to a more mature plan. Please note Chapter 112, Florida Statutes, requires that the plan sponsor contributes the minimum required contribution; thus, there is minimal solvency risk to the plan.
- The Funded Ratio, determined as the ratio of the Actuarial Value of Assets to the Total Accrued Liability, has decreased from 95.9% on October 1, 2013 to 81.6% on October 1, 2023.
- The Net Cash Flow Ratio, determined as the ratio of the Net Cash Flow (contributions minus benefit payments and administrative expenses) to the Market Value of Assets, decreased from 6.1% on October 1, 2013 to 1.9% on October 1, 2023. The current Net Cash Flow Ratio of 1.9% indicates that contributions are generally covering the plan's benefit payments and administrative expenses.

### Low Default-Risk Obligation Measure

ASOP No. 4, Measuring Pension Obligations and Determining Pension Plan Costs or Contributions, was revised as of December 2021 to include a “low-default-risk obligation measure” (LDROM). This liability measure is consistent with the determination of the actuarial accrued liability shown on page 11 in terms of member data, plan provisions, and assumptions/methods, under the Entry Age Normal Cost Method, except that the interest rate is tied to low-default-risk fixed income securities. The S&P Municipal Bond 20 Year High Grade Rate Index (daily rate closest to, but not later than, the measurement date) was selected to represent a current market rate of low risk but longer-term investments that could be included in a low-risk asset portfolio. The interest rate used in this valuation was 4.87%, resulting in an LDROM of \$45,712,732. The LDROM should not be considered the “correct” liability measurement; it simply shows a possible outcome if the Board elected to hold a very low risk asset portfolio. The Board actually invests the pension plan’s contributions in a diversified portfolio of stocks and bonds and other investments with the objective of maximizing investment returns at a reasonable level of risk. Consequently, the difference between the plan’s Actuarial Accrued Liability disclosed earlier in this section and the LDROM can be thought of as representing the expected taxpayer savings from investing in the plan’s diversified portfolio compared to investing only in high quality bonds.

The actuarial valuation reports the funded status and develops contributions based on the expected return of the plan’s investment portfolio. If instead, the plan switched to investing exclusively in high quality bonds, the LDROM illustrates that reported funded status would be lower (which also implies that the Actuarially Determined Contributions would be higher), perhaps significantly. Unnecessarily high contribution requirements in the near term may not be affordable and could imperil plan sustainability and benefit security.

It is important to note that the actuary has identified the risks above as the most significant risks based on the characteristics of the plan and the nature of the project, however, it is not an exhaustive list of potential risks that could be considered. Additional advanced modeling, as well as the identification of additional risks, can be provided at the request of the audience addressed on page 2 of this report.

ACTUARIAL ASSET VALUATION  
September 30, 2023

Actuarial Assets for funding purposes are developed by recognizing the total actuarial investment gain or loss for each Plan Year over a five year period. In the first year, 20% of the gain or loss is recognized. In the second year 40%, in the third year 60%, in the fourth year 80%, and in the fifth year 100% of the gain or loss is recognized. The actuarial investment gain or loss is defined as the actual return on investments minus the actuarial assumed investment return. Actuarial Assets shall not be less than 80% nor greater than 120% of Market Value of Assets.

| Plan Year<br>Ending | Gain/(Loss) | <u>Gains/Losses Not Yet Recognized</u>       |             |             |         |      |

| Benefit                             | Accrued benefit, reduced 3% per year to age 50 and actuarially reduced from age 50 to age 45.                                                                                                                                                             |
| <u>Vesting</u>                      |                                                                                                                                                                                                                                                           |
| Schedule                            | 100% after 10 years of Credited Service.                                                                                                                                                                                                                  |
| Benefit Amount                      | Member will receive the vested portion of his (her) accrued benefit payable at the otherwise Early (reduced) or Normal Retirement Date. If less than 10 years of service, Member's receive a refund of accumulated member contributions with 6% interest. |

## Disability

### Eligibility

Service Incurred

Covered from Date of Employment.

Non-Service Incurred

10 years of Credited Service.

### Exclusions

Disability resulting from use of drugs, illegal participation in riots, service in military, etc.

### Benefit

Benefit accrued to date of disability but not less than 42% of Average Final Compensation (Service Incurred).

### Duration

Payable for life (with 120 payments guaranteed) or until recovery (as determined by the Board). Optional forms of payment are available.

## Death Benefits

### Pre-Retirement

Vested: Monthly accrued benefit payable to designated beneficiary for 10 years at otherwise Early (reduced) or Normal (unreduced) Retirement Date.

Non-Vested: Refund of accumulated contributions with interest.

### Post-Retirement

Benefits payable to beneficiary in accordance with option selected at retirement.

## Supplemental Benefit

Effective January 26, 2015. Retirees who meet the normal retirement requirements are entitled to a monthly supplemental benefit equal to \$85.00 payable as a 10-year certain & life annuity (or actuarially equivalent benefit).

## Board of Trustees

Two Council appointees, one Member from each Department elected by the membership, and a fifth Member elected by other 4 and appointed by Council.

### Deferred Retirement Option Plan

|                      |                                                                                                                                                                                                                                                        |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Eligibility          | Satisfaction of requirements for Normal Retirement.                                                                                                                                                                                                    |
| Participation        | Not more than 60 months.                                                                                                                                                                                                                               |
| Rate of Return       | At election of Member (may change once during DROP period) either: 1) actual net rate of investment return (total return net of brokerage commissions, transaction costs, and management fees), or 2) 6.5%. Earnings are credited each fiscal quarter. |
| Form of Distribution | Cash lump sum (options available) payable at termination of employment.                                                                                                                                                                                |

### Chapter 175/185 Share Accounts

Pursuant to Chapter 2015-39, a share plan was established as of September 30, 2016 based on a mutual consent agreement between the City and the membership.

---

# **City of Crestview Police Officers & Firefighters' Retirement Plan**

Investment Performance Review  
Period Ending March 31, 2024

**MARINER**

## **1st Quarter 2024 Market Environment**

## **The Economy**

- The US Federal Reserve (the Fed) held rates steady during the first quarter. However, domestic equities rallied on the prospect that the Fed could cut rates later in 2024. In its press release for the March meeting, the Fed stated that “In considering any adjustments to the target range for the federal funds rate, the Committee will carefully assess incoming data, the evolving outlook, and the balance of risks.” In addition, the Fed will continue reducing its balance sheet as described in its previously announced plans.
- The Fed’s prolonged pause in its rate-hiking cycle and the insertion of the word “any” in its December press release gave the market hope that the Fed may be ready to pivot in its stance and begin reducing rates to a less restrictive level in 2024. The Fed’s published “Dot Plot” shared expectations of three quarter-point rate cuts during the year, which would be the first rate cut since the COVID pandemic in 2020.
- Growth in the US labor market continued in March, as nonfarm payrolls increased by 303,000 and unemployment held steady at 3.8%. Federal Reserve Chair Jerome Powell stated, “Strong hiring in and of itself would not be a reason to hold off on rate cuts,” adding that the job market is not a primary cause for concern around inflation. Powell added “an unexpected weakening in the labor market could also warrant a policy response.”

## **Equity (Domestic and International)**

- US equities moved broadly higher during the first quarter based on expectations of a more favorable interest rate environment in the coming year. The S&P 500 Index rose 10.6% for the quarter.
- International stocks experienced robust growth to begin the year, albeit muted by a strengthening US Dollar (USD). USD performance lagged local currency (LCL) performance in most regions for the quarter, though both currency readings were positive.
- GDP growth across regions remains mixed as many regions are dealing with local headwinds and tailwinds as much of the world continues to navigate sticky inflation with varying degrees of success. Conflicts abroad have dragged on performance, but as we have seen with the Russia-Ukraine conflict, market conditions will typically normalize once the broader impact has been reasonably assessed.

## **Fixed Income**

- While sticky inflation numbers and a robust job market likely prompted the Fed to keep the fed funds rate unchanged during the quarter, this lack of action also tempered expectations for potential rate cuts in 2024. Fixed-income markets fell in March (yield rose) on the belief that rates could be higher for longer.
- High-yield bonds outperformed investment-grade issues for the quarter, largely due to narrowing credit spreads and higher coupons. Although the high-yield bond benchmark’s duration is almost half of the US Aggregate Bond index’s duration, the high-yield index edged out the bellwether bond benchmark due to a relatively stable yield curve and the aforementioned narrowing credit spreads.
- Global bonds lagged the domestic bond market with the US Aggregate Index beating the Global Aggregate ex-US Index by 2.4%. This broke the two indexes’ tie in 2023 and left global bonds 2.4% behind the domestic bond market for the full year.

## **Market Themes**

- 2024 opened with strong results in domestic and international equity markets, continuing what was a robust 2023. Growth sectors continued to outpace value sectors but by a narrower margin than 2023, showcasing increased breadth across many markets.
- Central banks remained vigilant in their stances to bring inflation under control. While inflation readings remain stubbornly elevated, signs of stable-to-cooling price pressures have shown up in most regions around the world.
- Policy rates remained relatively stable across most developed markets as central banks continued their tight policy stance. However, there are expectations of looser monetary policy to take hold as 2024 progresses.
- Ongoing military conflicts coupled with economic uncertainty around the globe continue to act as headwinds in international markets. While global disruptions from the Russia-Ukraine conflict seemed to subside, the proxy war in the Middle East has spread to other countries in the region and unsettled shipping channels globally.

- Domestic equity markets carried their momentum from late 2023 into the first quarter of 2024. Economic indicators continued to signal improving conditions for growth and softening inflation, resulting in an ongoing tailwind for risk assets. For the period, the S&P 500 large-cap benchmark returned 10.6% versus 8.6% for the Russell Mid Cap Index and 5.2% for the Russell 2000 small-cap index.
- International developed and emerging market equities also posted solid results. European markets continue to face geopolitical risks related to the conflict in Ukraine, the Middle East is grappling with a proxy war that has spread beyond Israel and Palestine, and Asia is feeling contagion effects from China's economic uncertainty. Despite the uncertainty, the developed market MSCI EAFE Index returned 5.8% for the quarter, while the MSCI Emerging Markets Index advanced 2.4%.
- Most broad fixed income indexes fell slightly during the first quarter of 2024. While market participants were generally optimistic about the possibility of a Fed rate cut during the first half of the year, sticky inflation pushed out these expectations and caused markets to re-think the timing of 2024's potential rate cuts. The Bloomberg (BB) US Aggregate Index returned -0.8% for the quarter while investment-grade corporate bonds were down less, returning -0.4%.
- US equity markets posted a stellar 29.9% during the trailing one-year period. The weakest relative performance for the year was the Russell 2000 Index, which nonetheless climbed 19.7% over the last 12 months.
- International markets also showcased a healthy rebound in 2023. Over the trailing one-year period, the MSCI EAFE Index was the best international performer, returning 15.3% while the MSCI Emerging Markets Index added a more modest 8.2%.
- Bond markets were relatively flat over the previous 12 months. Investment-grade corporate bonds were the best-performing sector, up by 4.4%. Meanwhile, Treasuries have lagged, returning just 0.1% over the previous 12 months. The bellwether fixed-income benchmark, the Bloomberg US Aggregate Index, returned a muted 1.7% for the year.

### Quarter Performance

### 1-Year Performance

Source: Investment Metrics

- Domestic equity benchmarks were positive for the second consecutive quarter and growth style issues continued to outpace value. The best-performing area of the equity market was large-cap growth, with the Russell 1000 Growth index returning 11.4%. The worst performing area of the market was small-cap value, with the Russell 2000 Value index returning just 2.9% for the quarter. From a market capitalization perspective, large-cap stocks led their small-cap counterparts, with the Russell 1000 Index returning 10.3% and the Russell 2000 Index lagging with a lower, but still solid, 5.2%.
- The market continued its growth-led rally as growth stocks outpaced value stocks across the market-capitalization spectrum. While growth led the way during the quarter, value benchmarks largely kept pace, signaling that the rally seen in domestic equities may be broadening to other areas of the market.
- For the year, within large-cap stocks, the Russell 1000 Growth Index returned an impressive 39.0%, leading the way among style and market capitalization classifications. The weakest performing index for the year was the Russell 2000 Value, which still posted a double-digit return of 18.8%.
- The dominance of growth sectors is evident in the chart, with all growth benchmarks handily outpacing their core and value index counterparts. However, the strength of the outperformance differs meaningfully between the large cap and small cap segments of the market. The Russell 2000 Growth Index returned 20.3%, outpacing the Russell 2000 Value index return by a narrow margin of just 1.5%. However, this spread widens to 5.9% for the Russell Midcap Growth benchmarks and blows out to a span of 18.7% for the large cap benchmarks.

Source: Investment Metrics

- 2023's year-end rally continued into the first quarter of 2024 and expanded its breadth across styles and market capitalizations.
- Ten of the 11 GICS economic sectors in the large-cap Russell 1000 Index moved higher during the first quarter. Five of the 11 sectors outpaced the broad index return of 10.0%. Communication services led the way at 15.2% followed by energy (up 13.5%), financials (12.9%), information technology (12.5%), and industrials (11.4%).
- For the full year, all 11 economic sectors finished in positive territory with communication services leading the way at 47.5% and information technology following in lock step at 45.9%. Of the 11 sectors, four were up at least 30.0% the past year. Utilities (up 1.5%), consumer staples (8.0%), and real estate (9.4%) were the only three sectors that did not post double-digit results over the trailing year.
- Seven small-cap economic sectors posted positive results during the quarter with six of those sectors exceeding the 5.2% return of the Russell 2000 Index. The information technology (up 13.5%), energy (12.6%), and industrials (10.3%) sectors led the way as the only three sectors to showcase double-digit performance for the quarter. Utilities (-2.2%), real estate (-1.9%), communication services (-1.8%), and financials (-1.0%) sectors all lost ground during the quarter.
- Similar to large-cap sector performance, nine of the 11 small cap sectors were positive over the trailing year. Energy posted the strongest sector results (30.4%) with the information technology (30.3%) sector not far behind. Industrials (29.5%), consumer discretionary (21.8%) and financials (20.3%) each also returned more than 20.0% for the period. Six of the 11 economic sectors fell short of the core small-cap benchmark's return of 19.7% over the trailing year. The two negative sectors for the year were utilities with a return of -11.3% and communication services, which returned -2.1%.

### Russell 1000

### Russell 2000

Source: Morningstar Direct  
As a result of the GICS classification changes on 9/28/2018 and certain associated reporting limitations, sector performance represents backward looking performance for the prior year of each sector's current constituency, post creation of the Communication Services sector.

Source: Morningstar Direct

- Many of the international developed- and emerging-market benchmarks posted positive performance in both USD and LCL terms for the first quarter. A strengthening of the USD during the period was a drag on domestic non-US index performance across all regions. The developed-market MSCI EAFE Index still returned a solid 5.8% in USD and 10.0% in LCL terms for the period. The MSCI Emerging Markets Index rose by 2.4% in USD and 4.5% in LCL terms.
- Latin America was the only region to post negative performance for the quarter in both USD and LCL terms. The cyclical nature of demand for commodity exports in the region has resulted in greater volatility due to continued uncertainty over central bank policies and global demand.
- The heaviest weighted country in the emerging market index (China, 7.0%) continued its drag on broad index returns, returning -2.2% during the quarter. The Chinese economy grew at a rate of 5.2% in 2023, lower than its pre-pandemic rate of 6.0% which was a headwind for performance. Troubles in the commercial property and banking sectors have also created challenges for growth in the region.
- Much like domestic markets, trailing one-year results for international developed and emerging markets benchmarks were strong. Outside of EM Latin America, the USD showed strength over broad and regional benchmarks for the year, and as a result, LCL returns finished higher than USD performance.
- MSCI Pacific results led the way in LCL currency terms at 28.8% for the trailing year. USD returns for the region were still strong but returned a more muted 17.5% due to softening currency in the region. Due to demand for commodity exports and rising oil prices, EM Latin America was the only region where the USD weakened relative to LCL returns, resulting in higher USD returns (22.6% vs. 19.8%). The EM Asia regional benchmark was the weakest relative-performing region in the emerging market index, with the EM Asia index returning 6.3% in USD and 8.9% in LCL terms.

As a result of the GICS classification changes on 9/28/2018 and certain associated reporting limitations, sector performance represents backward looking performance for the prior year of each sector's current constituency, post creation of the Communication Services sector.

- Fixed-income markets pulled back slightly to start the year with many domestic and international bond indexes finishing modestly lower during the quarter. Yields remain elevated due to the Federal Reserve's decision to maintain rates at their current levels. While market expectations are that the Fed will eventually begin cutting rates in 2024, which will be a jolt to bond holder performance as yield fall, higher yields and coupon rates on bonds also are also offer an attractive stabilizing, lower-risk benefit for bond allocations in diversified portfolios.
- The Bloomberg US Aggregate Bond Index, the bellwether US investment grade benchmark, returned a mild negative result of -0.8% for the quarter. Performance across the investment grade index's segments finished the period with similar performance with the Bloomberg US Corporate Investment Grade Index returning -0.4% and the US Mortgage Index sliding by -1.0%.
- Outside of the Aggregate index's sub-components, high-yield bonds continued to rise with a return of 1.5% as credit spreads narrowed during the quarter. US TIPS fell -0.8% for the quarter. The Bloomberg Global Aggregate ex-US Index return of -3.2% for the quarter lagged all domestic fixed-income indexes as well as the multiverse benchmark's return of -1.9%.
- Over the trailing one-year period, the Bloomberg US Aggregate Bond Index climbed 1.7%. The benchmark's sub-components also posted positive performance over the trailing 12 months with the Bloomberg US Corporate Investment Grade Index rising 4.4% and the US Mortgage Index posting a more modest 1.4% return. US TIPS, which are excluded from the aggregate index, rose 0.5% for the year. High-yield corporate bonds, which have a much shorter duration, outpaced their investment grade counterparts with the Bloomberg US High Yield Index posting an equity-like return of 11.2% for the last year.
- Performance for non-US bonds were negative for the trailing year with the Bloomberg Global Aggregate ex-US Index falling by -0.7%. With foreign central banks largely tracking the Fed's tight monetary stance, the negative performance of global bonds is largely attributable to USD strength over the last year.

#### Quarter Performance

#### 1-Year Performance

Source: Bloomberg

- The gray band across the graph illustrates the range of the current Fed Funds target rate. During the first quarter, the Federal Open Market Committee (FOMC) continued to hold the rates steady in the 5.25%-5.50% target range. The last rate increase in the current cycle occurred at the FOMC's July 2023 meeting and while their press releases have continued to push economic data-dependent outcomes, subtle press release rewordings since last July have increased the likelihood there will be no additional rate increase in this cycle. With early April's inflation surprise, the CME FedWatch tool, which forecasts rates based on Fed Fund futures pricing, is predicting two 0.25% rate cuts for 2024, with the first occurring in September. Fed officials and market participants have expressed concern about leaving rates at their current levels for an extended period could tip the US economy into a recession, but inflation remains stubbornly elevated and higher rates are the FOMC's primary inflation-fighting tool. Additionally, the FOMC continues to remove liquidity from the market by allowing bonds held on its balance sheet to mature without reinvesting maturity proceeds.
- The yield on the US 10-year Treasury (green line of the top chart) rose modestly, opening at the at 3.88% and finishing the quarter at 4.20%. The 0.32% increase was largely attributable to sticky inflation data released throughout the quarter. The benchmark's rate peaked in October 2023, cresting at just under 5.00% before pulling back in the remainder of the year.
- The blue line in the top chart illustrates changes in the Option Adjusted Spread (OAS) for BAA-rated corporate bonds. This measure quantifies the additional yield premium that investors require to purchase and hold non-US Treasury issues with the lowest investment grade rating. During the quarter, the spread narrowed from 1.29% to 1.17%, which is equivalent to falling rates for BAA bonds. The spread measure has continued to narrow over the trailing 12-month period after concerns about the regional banking sector during March 2023 caused credit spreads to spike. High-yield OAS spreads (represented by the yellow line in the top chart) have also continued to narrow from 3.39% at the end of 2023 to 3.15% at the end of March 2024. This narrowing provided an additional boost to high yield performance.
- The lower graph provides a snapshot of the US Treasury yield curve at the end of each of the last four quarters. If the anticipated rate cuts materialize in 2024, the yield curve will steepen into a positively sloped yield curve, which is the normal shape of the yield. Historically, a persistent inversion of the yield curve, as measured by the spread between 2 and 10-year Treasuries, has been a precursor of an economic recession within six to 24 months. As of quarter-end, the current yield curve inversion has persisted for 21 months.

|                                       |                                                                                                                                                                                                                                                                                                                                                             |
|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Active Return</b>                  | - Arithmetic difference between the manager's performance and the designated benchmark return over a specified time period.                                                                                                                                                                                                                                 |
| <b>Alpha</b>                          | - A measure of the difference between a portfolio's actual performance and its expected return based on its level of risk as determined by beta. It determines the portfolio's non-systemic return, or its historical performance not explained by movements of the market.                                                                                 |
| <b>Beta</b>                           | - A measure of the sensitivity of a portfolio to the movements in the market. It is a measure of the portfolio's systematic risk.                                                                                                                                                                                                                           |
| <b>Consistency</b>                    | - The percentage of quarters that a product achieved a rate of return higher than that of its benchmark. Higher consistency indicates the manager has contributed more to the product's performance.                                                                                                                                                        |
| <b>Distributed to Paid In (DPI)</b>   | - The ratio of money distributed to Limited Partners by the fund, relative to contributions. It is calculated by dividing cumulative distributions by paid in capital. This multiple shows the investor how much money they got back. It is a good measure for evaluating a fund later in its life because there are more distributions to measure against. |
| <b>Down Market Capture</b>            | - The ratio of average portfolio performance over the designated benchmark during periods of negative returns. A lower value indicates better product performance                                                                                                                                                                                           |
| <b>Downside Risk</b>                  | - A measure similar to standard deviation that utilizes only the negative movements of the return series. It is calculated by taking the standard deviation of the negative quarterly set of returns. A higher factor is indicative of a riskier product.                                                                                                   |
| <b>Excess Return</b>                  | - Arithmetic difference between the manager's performance and the risk-free return over a specified time period.                                                                                                                                                                                                                                            |
| <b>Excess Risk</b>                    | - A measure of the standard deviation of a portfolio's performance relative to the risk free return.                                                                                                                                                                                                                                                        |
| <b>Information Ratio</b>              | - This calculates the value-added contribution of the manager and is derived by dividing the active rate of return of the portfolio by the tracking error. The higher the Information Ratio, the more the manager has added value to the portfolio.                                                                                                         |
| <b>Public Market Equivalent (PME)</b> | - Designs a set of analyses used in the Private Equity Industry to evaluate the performance of a Private Equity Fund against a public benchmark or index.                                                                                                                                                                                                   |
| <b>R-Squared</b>                      | - The percentage of a portfolio's performance that can be explained by the behavior of the appropriate benchmark. A high R-Squared means the portfolio's performance has historically moved in the same direction as the appropriate benchmark.                                                                                                             |
| <b>Return</b>                         | - Compounded rate of return for the period.                                                                                                                                                                                                                                                                                                                 |
| <b>Sharpe Ratio</b>                   | - Represents the excess rate of return over the risk free return divided by the standard deviation of the excess return. The result is an absolute rate of return per unit of risk. A higher value demonstrates better historical risk-adjusted performance.                                                                                                |
| <b>Standard Deviation</b>             | - A statistical measure of the range of a portfolio's performance. It represents the variability of returns around the average return over a specified time period.                                                                                                                                                                                         |
| <b>Total Value to Paid In (TVPI)</b>  | - The ratio of the current value of remaining investments within a fund, plus the total value of all distributions to date, relative to the total amount of capital paid into the fund to date. It is a good measure of performance before the end of a fund's life                                                                                         |
| <b>Tracking Error</b>                 | - This is a measure of the standard deviation of a portfolio's returns in relation to the performance of its designated market benchmark.                                                                                                                                                                                                                   |
| <b>Treynor Ratio</b>                  | - Similar to Sharpe ratio but utilizes beta rather than excess risk as determined by standard deviation. It is calculated by taking the excess rate of return above the risk free rate divided by beta to derive the absolute rate of return per unit of risk. A higher value indicates a product has achieved better historical risk-adjusted performance. |
| <b>Up Market Capture</b>              | - The ratio of average portfolio performance over the designated benchmark during periods of positive returns. A higher value indicates better product performance.                                                                                                                                                                                         |

Mariner Institutional compiled this report for the sole use of the client for which it was prepared. Mariner Institutional is responsible for evaluating the performance results of the Total Fund along with the investment advisors by comparing their performance with indices and other related peer universe data that is deemed appropriate. Mariner Institutional uses the results from this evaluation to make observations and recommendations to the client.

Mariner Institutional uses time-weighted calculations which are founded on standards recommended by the CFA Institute. The calculations and values shown are based on information that is received from custodians. Mariner Institutional analyzes transactions as indicated on the custodian statements and reviews the custodial market values of the portfolio. As a result, this provides Mariner Institutional with a reasonable basis that the investment information presented is free from material misstatement. This methodology of evaluating and measuring performance provides Mariner Institutional with a practical foundation for our observations and recommendations. Nothing came to our attention that would cause Mariner Institutional to believe that the information presented is significantly misstated.

This performance report is based on data obtained by the client's custodian(s), investment fund administrator, or other sources believed to be reliable. While these sources are believed to be reliable, the data providers are responsible for the accuracy and completeness of their statements. Clients are encouraged to compare the records of their custodian(s) to ensure this report fairly and accurately reflects their various asset positions.

The strategies listed may not be suitable for all investors. We believe the information provided here is reliable, but do not warrant its accuracy or completeness. Past performance is not an indication of future performance. #### **\*IMPORTANT DISCLOSURE INFORMATION RE GREENWICH QUALITY LEADER AWARD**

These ratings are not indicative of Mariner Institutional's future performance. These awards or any other rankings and/or recognition by unaffiliated rating services and/or publications should not be construed as a guarantee that a client will experience a certain level of results or satisfaction if they invest with Mariner Institutional, nor should it be construed as a current or past endorsement by any of our clients. Mariner Institutional did not pay a fee to participate in this award survey.

Methodology for this Award: For the 2022 Greenwich Quality Award for Overall U.S. Investment Consulting – Midsize Consultants – Between February and November 2022, Coalition Greenwich conducted interviews with 727 individuals from 590 of the largest tax-exempt funds in the United States. These U.S.-based institutional investors are corporate and union funds, public funds, and endowment and foundation funds, with either pension or investment pool assets greater than \$150 million. Study participants were asked to provide quantitative and qualitative evaluations of their asset management and investment consulting providers, including qualitative assessments of those firms soliciting their business and detailed information on important market trends.

## MEMORANDUM

To: Board of Trustees

From: Klausner, Kaufman, Jensen & Levinson

Subject: Form 1099-R: Reporting of disability annuity payments to first responders and other disabled taxpayers

Date: April 2024

---

On March 15, 2024, the IRS provided notice that they made changes to the 2023 Instructions for Forms 1099-R and 5498 to help clarify how to report disability annuity payments to first responders or other taxpayers on the Form 1099-R.

Revenue Ruling 85-105, 1985-2 C.B. 53 states that disability retirement payments made to a taxpayer "under a workmen's compensation act or under a statute in the nature of a workmen's compensation act" as compensation for personal injuries or sickness incurred during the course of employment may not be subject to federal income tax.

**A new paragraph was added to the 2023 Instructions:**

**Box 2a, Taxable Amount, now references Rev. Rul. 85-105 to help you determine the taxable and/or non-taxable amount of the disability payments. If the annuity payments are fully non-taxable, there should be a zero in box 2a.**

If a portion of the pension benefit is based on age or length of service under the retirement plan, enter that portion of the annuity in box 2a. See Rev. Rul. 85-105, 1985-2 C.B. 53. Enter distribution code 3 in box 7. This occurs when a member has an accrued benefit in excess of the fixed percentage of compensation awarded for service incurred disability. That "years-of-service" based amount in excess of the fixed percentage is taxable. This distinction was explained in *Sewards v. Commissioner of Internal Revenue*, 785 F.3d 1331 (9<sup>th</sup> Cir. 2015). Worker's compensation benefits are not dependent on years of service.

In light of this guidance, the firm recommends that your Fund should report any hybrid disability payments which are both taxable and potentially non-taxable on two separate 1099Rs. Any part of the disability pension that is based on the member's age or length

{00254812.DOCX;2}

of service should be reported as taxable. You may still code the fixed percentage disability portion as "taxable amount not determined" since Revenue Ruling 85-105 uses the language that such payment "may" not be subject to federal income taxes. Alternatively, if you have been reporting the fixed percentage disability portion as non-taxable, you may continue to do so. It is also recommended that members on disability retirement be advised to consult a qualified tax professional.

You should also be aware of the tax treatment of disabilities based on a presumptive disease. If the presumption is rebuttable, the disability based on a presumption is non-taxable. The IRS made this distinction in the case of *Take v. Commissioner*, 804 F.2d 553 (9<sup>th</sup> Cir. 1986). Thomas Take was an Anchorage, Alaska firefighter who retired on a service-connected disability based on heart disease. In his plan, the presumption could not be rebutted. The court determined that since the presumption could be rebutted for worker's compensation, but not under the pension, the benefit "was not in the nature of worker's compensation." In Florida, all presumptive disease clauses can be rebutted by other evidence with the sole exception of the firefighter cancer presumption. For that reason, disability retirement based on the cancer presumption is taxable.

To assist members in their tax filings, future disability orders will contain a paragraph regarding the method for determining the benefit whether a fixed percentage, based on years of service/age, or hybrid and if based on a presumption, whether that presumption is rebuttable or not. Our office will need to work with the administrator and actuary to document the calculation of the benefit.

As always, if there are any questions, please contact our office.
